A DAY IN THE LIFE OF...
A HIGH SCHOOL REMOTE LEARNING STUDENT

BEFORE SCHOOL

Wake up and grab breakfast at home (or pick-up breakfast from the nearest school).

- I make sure to wash my hands before eating.
- Login to Google Classroom to check out what learning assignments I have to complete.
- Plan day around synchronous class activities (online, live and face-to-face with my teacher).

1ST PERIOD

Login to Google Classroom and click the link for live video lesson with my Physics teacher.

- Take notes, submit questions through chat box, and complete independent assignment after lesson.
- I couldn’t upload my assignment so I called the ECISD Tech Support Line and they resolved my technical difficulties in a matter of minutes.

2ND PERIOD

Transition to my U.S. History live video lesson.

- Prepare for my U.S. History small group about our World War II presentation due next week.

3RD PERIOD

English III is next.

- Click link for live video
- Discuss pre-recording questions introducing Early American Writing and discuss questions in breakout groups and report to class.
- Begin reading context for Early American Writing.

LUNCH

Wash hands and then eat lunch at home (or pick-up lunch from the nearest school).
7TH PERIOD

I have baseball practice after school today, so I will drive myself up to campus (or get a ride from a parent if needed) during this period.

Before leaving home, I conduct a self-screening and wash my hands. I also bring my pocket hand sanitizer and facemask with me to school.

5TH PERIOD

Time for Algebra II class!

- Login to Google Classroom and complete the warm-up assignment.
- Then, open the link for today’s live video lesson.
- I don’t have any questions for my teacher, so I’m able to get started on my independent work right away.

4TH PERIOD

After Lunch I have Aerospace Engineering class which is my CTE (Career & Technical Education) course.

- My teacher shows us a video on the early design concepts, failures and successes.

6TH PERIOD

Login to Google Meets for my scheduled class with the Newspaper editorial board to discuss headlines for this month’s paper.

- The class ends a little early, so I’m able to work on some of my Algebra homework.
- My teacher said he would be available for virtual tutoring tomorrow morning at 8:00 a.m., so I want to get my homework done before then.

7TH PERIOD

Elective Period

- I have baseball practice after school today, so I will drive myself up to campus (or get a ride from a parent if needed) during this period.
- Before leaving home, I conduct a self-screening and wash my hands. I also bring my pocket hand sanitizer and facemask with me to school.

AFTER SCHOOL

I’ve recently been researching potential colleges online and I want to know how my academic record stacks up.

- So, this evening, I make a point to reach out to my counselor via email with a few questions. I’ll be taking the SAT in a few weeks.
- Before dinner, I take care of the rest of my assigned Algebra and Physics homework.
