In light of Governor Greg Abbott’s announcement on Tuesday, March 2, we want to let our Ector County ISD community know we will continue with our COVID-19 safety procedures, including the wearing of masks, as we seek guidance from the CDC, our local medical community, and review updated guidance from the Texas Education Agency.

We are encouraged to know that the COVID-19 situation is improving in Ector County; we want that to continue and we know the steps we have taken throughout this school year have helped limit the spread of the virus.

As we have since this pandemic began last spring, we will remain in regular communication with medical and education experts relying on their guidance and recommendations to inform our decisions. We want to assure our Ector County ISD team, our students and our families that health and safety will continue to be the top priority in our decision-making.
