INTERESTED in the challenge
READY to face the future prepared
Join NTO!
New Tech Odessa accepts only limited enrollment each academic year.

NTO’s Mission
Our mission is to develop learners who are college-ready, digitally literate, globally competent, and prepared to compete, connect, and cooperate with the rest of the world through an educational experience grounded in design and innovative thinking. Experience the difference by applying to attend today!

Project-Based Learning (PBL)
PBL uses the latest technology and inquiry to engage learners with issues and questions that are relevant to their lives. At NTO facilitators design rigorous projects tied to state standards and customize them to real-world applications and learner interests. Learners then work in teams to acquire and apply knowledge and skills to solve problems and create new work.

Proven Success
NTO’s approach to teaching and learning has proven successful in over 100 other public schools around the country that are part of the New Tech Network. NTO also employs College Readiness Assessments from Stanford University. Rates of acceptance to higher education institutions are above average.

Learners can participate in UIL activities at OHS or PHS if it is offered at the beginning or at the end of the day.

Three core values form the foundation of NTO:
TRUST
RESPECT
RESPONSIBILITY

Each learner receives a laptop for their use because we believe the effective use of technology is a critical component in our learner’s lives.
